Full-day land and water safaris in Chobe National Park

Full-day land and water safaris in Chobe National Park

Duration: 8h · Type: Classic

Join us for a full-day's adventure exploring Chobé National Park. We'll journey out on a safari in Jeeps through what is known as the most biologically diverse national park in Botswana. Stretching over 11,000 km^2 (4,500 sq mi), it is home to more than 250 different animal species and over 1/4 of the total elephant population in Africa. Enjoy lunch in our "floating restaurant" in the middle of the river where the views of the surrounding nature and wildlife are unparalleled. Afterwards, we'll board small private boats for a water safari on Chobé River all the way to Sedudu Island and its marshes. For several months each year, the island is submerged by floods, making it an ideal location to witness touching scenes of wildlife at the very heart of the Chobe National Park.

PLEASE NOTE
