EXCURSION LAS PALMAS + BANDAMA CRATER

Las Palmas and Bandama crater

Duration: 3h30 · Type: Classic

You will head to the historic district of Vegueta, the original heart of Las Palmas, founded at the end of the 15th century. Its squares are home to remarkable historic buildings such as the Casa de Colón (Christopher Columbus House), where you will discover fascinating insights into Christopher Columbus's voyages (exteriors), and the Santa Ana Cathedral. You will visit this outstanding monument, whose architecture harmoniously blends Gothic interiors with a Neoclassical façade. You will then continue to the Bandama Caldera. Near the steep rim of the caldera, Bandama Peak rises to an altitude of 575 metres. It is the most recent volcanic cone on Gran Canaria and also one of the island’s finest viewpoints.

PLEASE NOTE

- The order of the visits can change.
- Times are approximate.
- Good walking shoes are recommended.
