Duration: 4h · Type: Classic

Lucca is one of Italy's most fascinating and best-preserved medieval cities. The city has meticulously cared for its historic and cultural heritage so well, visitors find themselves in a virtual time capsule within its streets, squares, and churches. You'll set out to discover the remarkable center and its main monuments, including the exterior of the Basilica of San Frediano and San Michele in Foro's notable facade. You'll then visit the Saint Martin of Tours Cathedral, whose construction and, therefore, styles span almost 1,000 years. The cathedral's most precious possessions are the Holy Face of Lucca and Ilaria del Carretto's splendid tomb sculpted by Jacopo della Quercia.
