

The Meteora

The Meteora

Type: Classic

Discover one of the most spectacular sites in Greece. Although the original town of Kalambaka was destroyed during World War II, the Meteora monasteries remained intact on the summit of the rocks. The caves in the rocks were inhabited by hermit monks in the 9th century AD. They began to build monasteries in the 11th century, and at its peak in the 16th century, there were 24. Today, there are now six functioning monasteries still inhabited by either nuns or monks.
